

**Class 0 Armaflex®**

**Professional Insulation that Prevents Condensation and Energy Losses**

- » Built-in Vapour Barrier Prevents Condensation
- » Reduces Energy Losses
- » Easy to Apply

# Class O Armaflex®

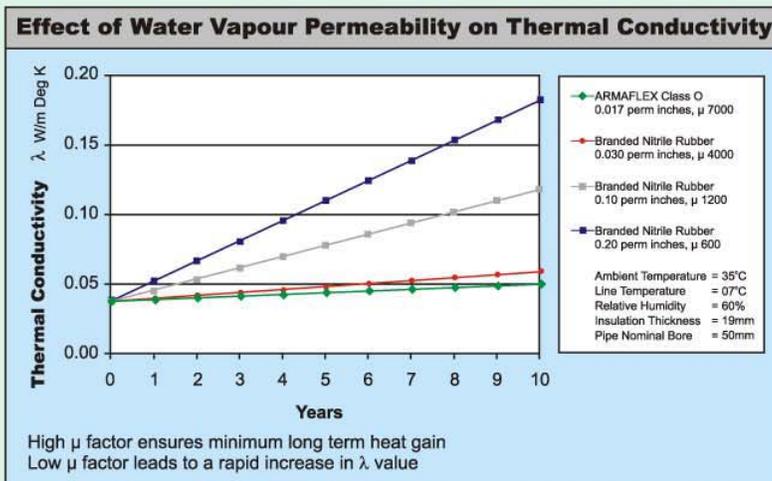

## The competitive advantages of specifying Class O Armaflex

- » Lightweight and flexible means easy and speedy installation with low maintenance, resulting in time and cost savings
- » Wide range of tube and sheet sizes available
- » The low thermal conductivity,  $\lambda 0.035 \text{ W/(m.k)}$  at  $0^\circ\text{C}$ , and good acoustic performance provide double benefits with one insulation system
- » Closed cell structure provides a very efficient built-in vapour barrier
- » A high,  $\mu 7000$ , resistance to water vapour transmission and water ingress, gives long term insulation efficiency for condensation control
- » Class O fire category means low fire propagation index, producing minimal contribution to overall heat release, and a zero surface spread of flame for a high degree of fire protection and safety
- » Excellent resistance to the effects of ozone, oil, chemicals
- » Dust, fibre, CFC and HCFC free with an ODP of zero

## Water Vapour Permeability

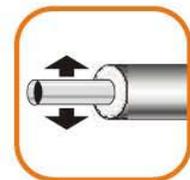

The moisture diffusion resistance factor,  $\mu$  factor, is a dimensionless number describing how many times better a material is at resisting the diffusion of water vapour, compared with an equivalent thickness of air. A high  $\mu$  factor as with Class O Armaflex demonstrates a superior long term performance of the insulation to resist the diffusion of water vapour.

Fire performance

Condensation control

Energy conservation

Frost protection

## Technical Data

	Values	Remarks
<b>Material</b>	Foamed nitrile rubber	
<b>Temperature Range</b>	Max. Surface Temperature +105°C Max. Temperature for Flat Surface +85°C Min. Surface Temperature -40°C*	*Please consult our Technical Department for low temperatures down to -200° C
<b>Thermal Conductivity at 0°C</b>	0.035 W/m Deg K	
<b>Thermal Conductivity at +20°C</b>	0.037 W/m Deg K	Testing according to DIN 52 612, DIN 52 613
<b>Thermal Conductivity at +40°C</b>	0.039 W/m Deg K	
<b>Water Vapour Permeability</b>	Moisture Resistance Factor $\mu > 7,000$ $2.48 \times 10^{-14}$ kg/(m.s.Pa) $8.91 \times 10^{-11}$ kg/(m.hr.Pa)	Testing according to DIN 52 615
<b>Water Absorption</b>	0.9% average volume after 28 days 1.5% maximum volume after 28 days	
<b>Fire Propagation</b>	Total Index Performance (I) Less than or equal to 12 Sub Index (i <sub>1</sub> ) Less than or equal to 6	Surface Spread of Flame according to BS 476 Part 7: 1997 Fire Propagation according to BS 476 Part 6: 1997
<b>Fire Performance</b>	<b>CLASS 0</b>	As per building regulations (England & Wales) for Class O fire category
<b>Reaction to fire</b>	Self-extinguishing, does not drip	
<b>Noise Reduction</b>	Acoustic level upto 30dB (A)	Installation noise normal (IGN) according to DIN 52 218
<b>Resistance to</b>	Building Materials Very Good Ozone Very Good	
<b>Health Aspects</b>	<b>Dust &amp; Fibre Free</b>	

Outdoor applications should be painted with Armafinish FR paint to the recommended thickness. Two or more coats may be required.

All data and technical information are based on results achieved under typical application conditions. Recipients of this information should, in their own interest and responsibility clarify with us whether or not the data & information apply to the intended application area.
